🛒 LilyPad Multi-Cart

To streamline integrations with third-party logistics providers and external systems, LilyPad Multi-Cart offers **robust 3PL and CSV data exchange features.**

These tools simplify the import and export of essential order and shipping information, ensure compatibility with various file formats, and automate data flows between your system and external platforms.

3PL Data Exchange

• Users have the ability to import and export all of the needed files for 3PL companies

• An FTP site is used to facilitate all of the file uploads and downloads

• Users can map to any 3PL csv template

• Check the status of file imports and exports with included reports

4 Functions in 1 Connection

• Export Purchase Orders

• Import Order Acknowledgements

• Export Sales Orders

• Import Ship Notices
