

LilyPad Nexus

THE FISHBOWL WEB CLIENT

AI web client
for Fishbowl

BUILT FOR FISHBOWL

AI POWERED BY CLAUDE

ANY BROWSER

Your Fishbowl, in the browser.

The modern web client for Fishbowl — with an AI assistant inside it. Run your day-to-day workflows from any browser, and ask in plain English to get the rest done.

SPOTLIGHT • AI ASSISTANT

Automation you don't have to think about.

Powered by Claude and working on your live Fishbowl data — the assistant reads, drafts, and answers, so your team stops retyping and starts approving.

- ✓ Draft purchase & sales orders by asking in plain English.
- ✓ Drop a PO PDF on an order and watch it fill itself in.
- ✓ Search inventory and orders in plain English.
- ✓ Summarize shipments and build reports instantly.
- ✓ More AI-powered workflows on the roadmap.

The screenshot shows the web client interface for app.lilypadnexus.com. At the top, the 'Nexus assistant' is active, with a status 'Fishbowl connected'. A green button prompts the user to 'Reorder everything below safety stock and group it by vendor.' Below this, the assistant reports: 'Found 7 parts below safety stock across 3 vendors. Drafted these POs:'. A table follows with the following data:

VENDOR / PART	QTY	PO
Acme · BRK-200	480	2041
Acme · CLP-18	1,200	2041
Northwind · VLV-9	96	2042

Below the table are two buttons: 'Create 3 POs in Fishbowl' and 'Edit'. At the bottom, a dark overlay shows a 'PDF to Sales Order in 8 seconds' workflow, indicating '12 lines · ship-to · PO # — ready to confirm' and a green play button. A footer note states: 'No mistakes from typing fast at 4:55PM on a Friday.'

What Nexus adds on top of Fishbowl

AI Assistant

POWERED BY CLAUDE

- ✓ Export & Save

Manufacturing

OPTIONAL ADD-ON

- ✓ Work Orders
- ✓ Shop Floor Visibility
- ✓ Production Tracking
- ✓ For Teams That Need It

A DAY AT WORK — BEFORE & AFTER

Order entry that doesn't ruin a Friday

An email comes in with a 12-line customer PO.

● TODAY

Someone retypes all 12 lines by hand — and hopes they got the quantities right.

● WITH NEXUS

Drag the PDF in, confirm, save. Done. Lines, quantities, and ship-to extracted for you.

Pallets your shipping department actually trusts

"Which pallet went on which order?"

● TODAY

Side-spreadsheets track pallets by hand, and nobody fully trusts them.

● WITH NEXUS

Pallet traceability in seconds — see every order, item, and shipment connected to any pallet.

Custom reports, endless possibilities

A manager needs a report that doesn't exist yet.

● TODAY

Operational reports live in spreadsheets, and every new request needs engineering.

● WITH NEXUS

Build reports, dashboards, and insights yourself. No backlog, no bottlenecks.

FISHBOWL STAYS YOUR SYSTEM OF RECORD

Nexus is the modern client your team actually works in.

Browser-based, multi-tenant, built on a modern stack — deployable in days, not quarters.
